📇 PROFILE

Web developer with a 3-year trajectory mainly in Fullstack development, but with a primary inclination towards Backend. I consider myself an organized and methodical person, goal-oriented, team-oriented, and focused on long-term objectives. My self-taught approach has allowed me to acquire various skills, focus, and discipline to adapt efficiently to new challenges.

💼 PROFESSIONAL EXPERIENCE

VALocator, Fullstack Developer 🔗
March 2023 – May 2024
I played a key role in the collaborative development of a Recruiter Management App. This system signicantly streamlined and shortened the recruitment process of Virtual Assistants to less than 3 days. Developed in PHP 8, Laravel 9, Vue 3 and successfully deployed the system live on Ubuntu VPS Cloud Service.

Innovative Gx Health, Fullstack Developer
July 2021 – March 2023
- Developed a Client Portal for Pharmacological Sample Results using PHP8 Laravel 9, Vue 3, InertiaJS, and TailwindCSS. Successfully deployed live on an Ubuntu VPS.
- Implemented and maintained a Sales Reporting App using Vue 3 and Bootstrap 4 on the frontend and Laravel 9 on the backend, with MySQL as RDMBS. Successfully deployed it live on an Ubuntu VPS.
- Provided support on numerous projects for optimization and debugging, using languages such as Javascript, PHP and Python.

Freelance, Fullstack Developer
October 2019 – January 2021
- Optimized and maintained user experience features and website performance enhancements with HTML, CSS, Javascript, and PHP for both Wordpress and legacy sites.
